

METABOLIC SKIN HEALTH Recharging Your Skin's Energy

Have you ever noticed that your skin looks vibrant and glowing one day, but dull and tired the next? Great skin starts deeper than the surface. True radiance and resilience depend on metabolic skin health: the energy that powers skin cells from within.

At the centre of this process are mitochondria, the tiny "batteries" inside your cells that produce ATP, the energy your skin needs to repair itself, create collagen, maintain hydration, and defend against environmental stress. When energy levels drop, skin can appear dull, dry, and inflamed.

The exciting news? With the right skin care approach, you can help recharge your skin's energy at the cellular level. That's where GERNétic's **MITO SPECIAL PLUS** comes in.

Why Skin Loses Energy

Ageing, UV exposure, pollution, stress, inflammation, and poor nutrition all drain mitochondrial energy. Even with a good skin care routine, skin may struggle if it lacks the energy to respond effectively.

Metabolic Skincare

Unlike traditional skin care that focuses only on the surface, metabolic skincare supports how skin functions at a cellular level. By energising skin cells, we can help skin recover its natural vitality, resilience, and youthfulness. It's not about adding another layer of moisture or protection - it's about helping the skin help itself. When your skin cells are energised, they naturally repair damage faster, strengthen the barrier, and maintain hydration more effectively.

Meet MITO SPECIAL PLUS

MITO SPECIAL PLUS is a professional oxygenating mist designed to recharge tired skin from within. Its blend of oxygen, peptides, amino acids, and glycoproteins stimulates fibroblasts: boosting collagen, enhancing hydration, increasing radiance and helping faster repair. It's more than a refreshing mist. **MITO SPECIAL PLUS** is a treatment-grade formula designed to work at the cellular level, restoring mitochondrial efficiency and rebooting skin's natural energy systems.

Benefits include:

- ✓ Improved firmness and elasticity
- ✓ Faster healing and recovery
- ✓ Smoother, better-hydrated skin
- ✓ Brighter, more energised complexion

Who Is It For?

Ideal for ageing, stressed, dull, or dry skin, as well as post-procedure recovery, acne scarring, and stretch marks. Whether your goal is to prevent early signs of ageing or to revive skin that feels tired and depleted, Mito Special Plus gives your complexion the power to bounce back.

How to Use

Use in clinic or at home by misting onto cleansed skin morning and evening before serums or moisturisers to enhance absorption and energise the skin.

The Future of Skincare

Modern skincare is moving beyond the surface. By supporting mitochondrial health, we help skin function better today and to protect its future. GERNétic has always championed this philosophy, using advanced nutritional skincare to work with the body's natural processes. **MITO SPECIAL PLUS** is the perfect example as it is helping skin regain energy, resilience, and lasting beauty. Because when your skin's batteries are charged, everything works better: healing is faster, hydration is deeper, and radiance is renewed. Your skin is a living organ powered by energy. Restore its natural vitality by supporting its metabolism and unlock lasting radiance, resilience, and youthfulness.

HEALTHY TANNING WITH THE GERNÉTIC SUN PRODUCT RANGE

To use GERNétic International sun screen is to tan with confidence this summer!

Sun protection is essential for all skin types and sun screen products must offer optimal protection and comfort. We all know the benefits of sunlight - life wouldn't be possible without it, it helps us feel happy and allows our bodies to synthesize Vitamin D essential for its operation. However, UV rays are also responsible for sunburn and cells' damage - and sun damage is irreversible. It is therefore necessary to protect the skin.

GERNétic's sun screen range perfectly meets your needs and expectation. The range has been divided into 3 levels of sun protection, allowing everyone, regardless of age and skin type, to enjoy the sun.

The **MELANO** products are non-whitening, without nanoparticles with a fresh, citrus orange and bergamot smell. The range is composed of 3 products which all contain Apricot oil, rich in oleic acid, vitamins A and E. Apricot Oil is nourishing, softening, regenerating and non-dehydrating and contributes to delaying the effects of ageing.

MELANO 15 - SPF 15 90 ml tube

This cream offers medium protection and is aimed at people with matt and dark skins who tan easily without getting sunburned. **MELANO 15** contains Shea butter which has nourishing and repairing properties and prevents dehydration.

MELANO 30 - SPF 30 125ml pump bottle dispenser

This liquid emulsion offers high protection and is aimed at light skinned people who tan quite easily, but can get sunburned.

MELANO 50 - SPF 50 125ml pump bottle dispenser

This liquid emulsion offers high protection for people with very light, milky white skin, often with freckles, who get sunburned very easily.

GEL APRÈS SOLEIL 90 ml tube

If you do get a sunburn, our essential **GEL APRÈS SOLEIL** is still available to help soothe, restore and regenerate your skin. And don't forget our star product **SYNCHRO** was first designed as a burns cream and also helps with sunburns.

New Cells Booster Mask

Sea Deep Marine Products

Beyond the Face

Metabolic Skin Health

GERNétic
INTERNATIONAL

NEW PRODUCT: CELLS BOOST
The New Generation Biocellulose Mask
Your Instant Skin Revival Mask

GERnétic International proudly introduces **CELLS BOOST**, the very first biocellulose mask in the GERnétic range - a breakthrough treatment designed to deliver immediate visible results while respecting our brand's unique cellular philosophy.

This next-generation mask acts like a second skin, perfectly fitting the contours of your face while delivering a highly concentrated serum deep into the skin and giving your skin an immediate boost of freshness, radiance and comfort.

Powerful Active Ingredients

Cells Boost combines advanced skin science with carefully selected plant and marine actives for four targeted actions:

Soothing

Calendula, Aloe Vera and Viola Mandshurica extracts provide anti-inflammatory and antioxidant benefits, reducing irritation and restoring comfort immediately.

Anti-Ageing

Vitamin C and Vitamin B3 (Niacinamide) stimulate collagen and elastin synthesis, protect against oxidative stress and promote a more even, luminous complexion.

Plumping

Natural sugars and amino acids help retain water within the epidermis, restoring bounce, volume and suppleness.

Regenerating

Marine and plant actives including Laminaria Japonica and Japanese Yam activate cellular regeneration and reinforce the skin barrier for improved resilience and vitality

Why You'll Love It

Visually luminous and generously infused, the mask feels cool, dense and flexible on application. You will experience an immediate sensation of freshness and comfort as the biocellulose film adapts perfectly to facial contours.

After just 10 minutes, skin looks smoother, brighter and more hydrated. The longer the mask is left on, the deeper the regenerating and soothing benefits. Perfect before a special event, or when your skin feels tired or dull.

Professional Results at Home

Each box contains 5 individually infused masks, giving you a luxury salon-level treatment whenever your skin needs a lift.

Summer Beauty - Sea Deep

GERnétic use the healing and relaxing properties of the sea in their **MARINE & SPA PRODUCTS**. So if you are not able to go for a dip, why not use our **MARINE & SPA LINE** to bring the sea home to you this summer?

This unique range combines ingredients rich in essential nutritional elements with active ingredients of essential oils. When applied to the skin these penetrate the cutaneous layer and stimulate a process of osmosis and positive physical synergy giving dull skin new radiance.

Algae live in harsh, aggressive natural environments which help them develop specific defences and acquire new abilities such as the synthesis of vitamins. Algae are extraordinary living organisms that grow without fertilizer, without pesticides, without genetic manipulation. Being rootless, they are forced to capture and concentrate the active elements of the sea, making them much richer substances than terrestrial plants.

MARINE GUMMING CLEANSER (90ml or 2x90ml)

This avant-guard gentle exfoliating cleanser contains marine sediments and oyster shell, rich in some of the most essential minerals. It removes make up and cleanses deep into the pores. The gentle exfoliating action removes dead cells leaving the skin extremely soft.

MARI NE DAY BASE (30ml)

Revitalising cream that strongly stimulates the renewal of skin cells. It is light and penetrates easily ensuring a perfect make up base. It is ideal for day use as it contains a sun factor.

MARINE MASK (30ml)

Brightening, supple cream mask with soothing, toning, remineralising and rejuvenating properties. Created for all aged, demineralized, dehydrated, wrinkled skins and sagging tissues.

GER LIFT (30ml)

True biological lifting cream which will help reduce lines and wrinkles, making the skin supple and bright. It is regenerative, penetrating easily with quick, lasting and spectacular effects, without any irritation to the skin.

If you like these Marine Face products, why not give the complementing Body Products a try?

**Beyond the face:
Skincare for Bust and Body**

When most of us think about skincare, our minds immediately go to the face. Cleansers, serums, moisturisers, all aimed at keeping complexions glowing. But from a holistic perspective, the skin on our bodies deserves just as much care and attention.

GERnétic's **BUST AND BODY RANGE** has long been a favourite in salons and among loyal clients. These products represent one of the most fascinating aspects of the brand: advanced cellular nutrition applied beyond the face, targeting areas of the body that often concern us the most: bust firmness, cellulite, skin tone, and stretch marks.

THE PHILOSOPHY BEHIND GERNÉTIC BODY CARE

Founded in 1978 by French biologist Albert Laporte, GERnétic was born from research into cellular biology. His vision was clear: if the body's cells are given the right nutritional molecules (amino acids, proteins, peptides, vitamins and trace element) they have the ability to restore balance and harmony in the skin. This principle doesn't just apply to facial skin care. By delivering carefully selected actives through biotechnology and phytochemistry, GERnétic body care products are designed to nourish, support and revitalise the skin all over the body. The focus is always on promoting comfort, vitality and improved appearance, while respecting the skin's natural functions.

BUST HARMONY AND CONFIDENCE

The bust area is one of the most delicate zones of the body. Skin here is thinner, more sensitive, and prone to changes over time due to natural ageing, hormonal fluctuations, or lifestyle factors. GERnétic's bust range was created to help support firmness, tone, and overall harmony.

SEINO LOTION prepares the skin for deeper nourishment, using ginseng, hops and hamamelis extracts to tone and refresh.

ENDO SPECIAL PLUS and **MACRO 2000** deliver amino acids, peptides and marine extracts to enhance elasticity and support tissue resilience.

These formulations work in synergy, providing nutrition that helps the skin look and feel more supple and comfortable. Clients often incorporate these products into a dedicated bust care ritual, much like a facial.

ADDRESSING COMMON BODY CONCERNS

CELLULITE AND CIRCULATION

Cellulite is a universal concern, often linked to circulation, fluid retention and lifestyle factors. **VASCO ARTERA CREAM** combines botanical extracts such as horse chestnut, chamomile and artichoke with key nutrients like amino acids and vitamins. This unique blend helps improve skin texture and leaves legs feeling lighter and more revitalised.

FIRMING AND TONING

For areas where skin slackening is more noticeable — thighs, buttocks, stomach or arms — **SOMITO CREAM** offers targeted firming care. Enriched with proteins, amino acids and vitamins, it helps to tone and support skin prone to loss of elasticity. Clients describe it as leaving their skin feeling smoother and more resilient with consistent use.

STRETCH MARKS

Stretch marks can appear during periods of rapid growth, pregnancy or lifestyle changes. **ANTI-STRIES CREAM** was designed to help prevent and improve the visible appearance of stretch marks by supporting collagen and elastin synthesis. Thanks to its advanced peptide technology, it helps the skin look more even and supple over time.

A RITUAL OF SELF-CARE

What makes GERnétic's body care special is not just the formulations themselves, but the ritual of applying them. Massaging these creams into the skin is an act of self-care that promotes relaxation, body awareness and daily moments of wellbeing. Therapists often combine GERnétic body products with specific massage techniques to enhance their effect. At home, clients can recreate a similar experience by taking a few minutes each day to gently massage their chosen cream into the skin, focusing on areas of concern.

WHY INVEST IN BODY SKIN CARE?

Our bodies tell the story of our lives - every milestone, every change. While diet, exercise and lifestyle play undeniable roles in how we feel in our skin, topical body care provides a valuable complement. By choosing products enriched with nutrients, we give our skin the tools it needs to maintain its comfort, resilience and beauty.

GERnétic's bust and body products are not about chasing unrealistic ideals, but about supporting each person's natural shape and helping them feel confident in their own skin.

GERnétic bust and body treatments are more than just creams in a jar. They represent a philosophy: that every part of our skin deserves the same nutrition and care we dedicate to our faces. Whether your focus is on bust harmony, smoother legs, firmer contours or improving the look of stretch marks, these products offer a sophisticated, science-based way to support your body's natural beauty.
